

Ship Bells

Model KG-15 Manual Ship Gong

The Kahlenberg KG-15 Manual Ships Gong is built to withstand decades of use in commercial and military marine service. With the exception of bronze bushings in the operating mechanism, the KG-15 is built entirely from stainless steel including the mounting bracket assembly. Manually operated with a stainless pull lanyard, the KG-15 Bell is a simple but effective solution to meet International IMO and COLREG requirements for a gong (in addition to ship's bell) sounding at a minimum of 110 dB(A) on all vessels over 100 meters in length.
